MATURI JASWANTH SAI MADHU MOHAN

Cybersecurity Professional | Penetration Tester & Bug Bounty Researcher
+91 8247060862 | jaswanthsaimaturi19@gmail.com | Guntur, Andhra Pradesh, India
Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Recently graduated Cybersecurity professional (B.Tech, Dhanalakshmi Srinivasan University) with hands-on experience across penetration testing, bug bounty research, and security tool development. Active researcher on HackerOne, Bugcrowd, and direct vendor disclosure programs, with peer-reviewed published research (IJIRT, Impact Factor 8.412) on a 21-tool web-based security toolkit. Currently pursuing EC-Council's CPENT certification and selected for the “Hack for Humanity” program toward LPT certification.

TECHNICAL SKILLS

Security Domains: Penetration Testing, Web & API Vulnerability Assessment, Bug Bounty Research, OSINT & Reconnaissance, Network Security, Vulnerability Disclosure & Reporting
Tools & Platforms: Nmap, Wireshark, Burp Suite, Maltego, RustScan, Subfinder, Amass, Kali Linux, Parrot OS
Programming & Web: Python, Bash, JavaScript/TypeScript, HTML, MySQL, React
Bug Bounty Platforms: HackerOne, Bugcrowd, Direct Vendor Disclosure

CERTIFICATIONS

- **CPENT** (Certified Penetration Testing Professional) — EC-Council *(expected 2026)*
- LPT (Licensed Penetration Tester) — EC-Council “Hack for Humanity” Program *(expected 2026)*

PUBLISHED RESEARCH

Cyber Guardian 360: A Web-Based Cybersecurity Toolkit for Real-Time Security Analysis
International Journal of Innovative Research in Technology (IJIRT) | ISSN 2349-6002 | Impact Factor 8.412 | Vol. 12, Issue 12, May 2026

- Co-authored a browser-based toolkit executing 21 real (non-simulated) security tools via secure APIs, incl. Nmap, Subfinder, Amass, RustScan, and OSINT scanners
- Architected on React, TypeScript, Tailwind CSS, Supabase PostgreSQL, and Deno Edge Functions; deployed via Vite, Vercel, and Cloudflare
- Three-interface system (Tool Cards, Terminal Emulator, File Viewer); validated with live case studies incl. subdomain enumeration returning 3,000+ results

BUG BOUNTY & SECURITY RESEARCH

- 6–12 months as an active security researcher across HackerOne, Bugcrowd, and direct vendor disclosure programs
- Researched and reported vulnerabilities across web application, API, and infrastructure targets — incl. information disclosure, misconfigurations, and client-side desync issues
- Authored a detailed infrastructure security report on sandbox/container architecture for a major AI provider's HackerOne program
- Structured methodology: reconnaissance → vulnerability analysis → proof-of-concept → severity assessment → report writing

PROJECTS

Project Life (“Lia”) — AI Emotional Companion & Smart Assistant *(Personal Project)*

- Conceived and designed a cross-platform AI companion that talks, listens, and reads user emotion in real time — combining conversational AI, vision-based emotion detection, a voice assistant, and a floating overlay UX
- Authored the complete technical architecture and product specification end-to-end, selecting the stack (Flutter, Electron/Tauri, OpenAI/Groq APIs, Whisper for speech-to-text, TTS for voice output) and designing the emotion-detection and companion-personality system

Cyber Guardian 360 *(Web-Based Cybersecurity Toolkit)*

- Co-developed and published a browser-based security toolkit executing 21 real (non-simulated) tools via secure APIs — Nmap, Subfinder, Amass, RustScan, OSINT scanners; built on React, TypeScript, Tailwind CSS, and Supabase (see Published Research)

Fraud Detection & Reporting System / JS Online Guardian *(Android)*

- Real-time fraud detection for digital payments using behavioral analysis, anomaly detection, and basic ML; extended into an Android app (JS Online Guardian) with geolocation monitoring, OTP-based verification, and real-time alerts across AP, Telangana, Tamil Nadu, and Karnataka
- Built with Android Studio, Python (ML/backend logic), and transaction-monitoring APIs

Automated Bug Bounty Toolkit

- Built a Python-based recon automation toolkit covering subdomain discovery, directory brute-forcing, API endpoint testing, and vulnerability scanning; released as an open-source project on GitHub

INTERNSHIPS

Cybersecurity Internships — Multiple Organizations

- Completed internships focused on Ethical Hacking, Network Security, Security Policy Auditing, and Incident Handling & Response

EDUCATION

B.Tech in Cyber Security — Dhanalakshmi Srinivasan University, Tiruchirappalli, Tamil Nadu *2022 – 2026*
Intermediate — Narayana Junior College *2020 – 2022*
Schooling — Bhashyam Public School *2020*

LANGUAGES

English, Telugu
